

Filtair Pro

New preformed disposable mask From ESAB

The Filtair Pro has been developed to improve the comfort of disposable respirators whilst maintaining an excellent face fit. Using the latest filtering technology and low profile valves, breathing resistance is reduced. Colour coding the range makes identification simple when varying levels of protection.

Features

Outer mesh shell – supports the filter media, maintains shape and prevents collapse onto face

Nose clip free – preformed nose bridge, provides comfortable fit eliminating the need for regular adjustment

Utilising the latest filter technology – promotes low breathing resistance

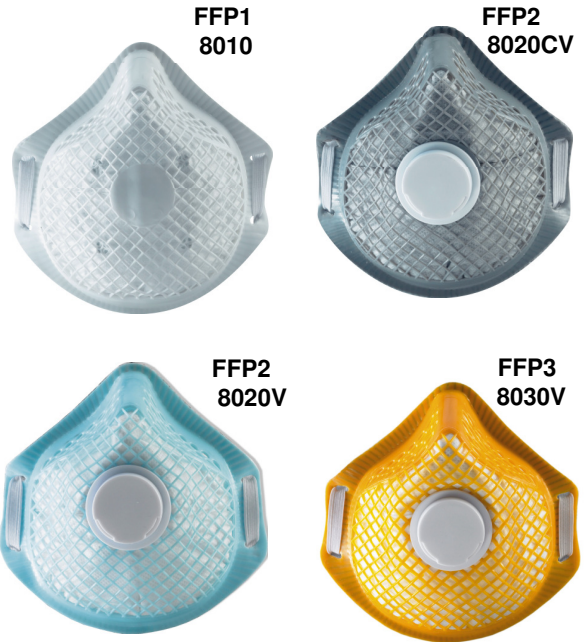

Wide, continuous loop head strap – effectively distributes the tension to avoid any ‘tight spots’

Adjustable clipped head strap – enhances good face fit and allows respirator to drop away from face when not in use

Low profile valve – aids field of vision and reduces heat and moisture build up in the respirator

Compatible with a wide range of other Personal Protective Equipment

Completely metal free – suitable for food industry applications

Continuous Loop Strapping

Adjustable Clip

Technical data

Filtair Pro	Approval EN149: 2001	Pieces in a Box	Non Toxic Dusts	Fine toxic Dusts/Mist Fumes	Odours/ Org. Vapours	Very fine toxic Dusts/Mists Fumes	Metal fume

Quality accessories for the quality welder

ESAB offers a wide range of accessories. The complete range, along with product information, is available at our local web-sites, look at www.esab.com or contact your local ESAB dealer.

Unrivalled service and support

Our commitment and ability to deliver the expected service and support starts immediately after the order is confirmed. We endeavour to offer our customers an After Sales service, which is second to none. A strong and skilful service organisation is prepared to offer service and maintenance, calibration, validation and upgrading of equipment and software.

The service organisation will offer standardised solutions for the reconditioning or modification of existing products.

Spare and wear parts are manufactured according to ESAB's quality plan. Exchange Printed Circuit Board (PCB), exchange modules and components are available for all our products in order to reduce downtime to an absolute minimum. ESAB is continuously upgrading authorised service partners for local service support. Customers who have their own service and maintenance personnel will always be offered a service-training package as part of a total ESAB offering. However, product and process training for end-users will form an additional part of the ESAB offering. Always ask your ESAB sales representative or distributor for a complete ESAB solution.

Certification:

The Filtair Pro range of FFP's meet the requirements of EN 149:2001 and are CE-marked in accordance with the requirements of European Directive 89/686/EEC
