

New-Tech™

With Hard Hat Combinations

”Using the Hard Hat Adapter”

The New-Tech™ helmets have been developed to be as versatile as possible and can be used in combination with ESAB respiratory equipment, hard hats & internal grinding visors. The most unique combination being the New-Tech™ helmet and the hard hat using a simple to use hard hat adapter.

By removing the head harness from a New-Tech™ helmet and replacing it with the hard hat adapter, the New-Tech™ can be easily and quickly fitted on to an ESAB hard hat

The combination is very well balanced and comfortable to wear. The helmet can be detached and reattached in a second, without removing the hard hat from the head, even by an operator wearing gloves.
